

# Batuhan Karamemiş

Front end Developer

## Profile

Dynamic front-end developer specializing in creating engaging, user-centric web and VR/AR solutions. Proficient in Unreal Engine, dedicated to pushing technological boundaries.

## Employment History

### Web Development Intern at Erciyes Anadolu Holding, Kayseri

June 2019 — August 2019

- Designed and developed a booking website with an integrated database.
- Enhanced user experience by streamlining booking processes.

### React.js Developer Intern at Erciyes Anadolu Holding, Kayseri

July 2021 — September 2021

- Developed two major web applications using React.js and integrated APIs for dynamic content:

**GitHub User Search App:** Enables users to search for GitHub profiles, displaying comprehensive details.

**Weather App:** Utilized API for real-time weather updates combined with a visually appealing UI design.

### VR and AR Developer at Virtuart, Kayseri

February 2023 — July 2023

- Developed an immersive multiplayer VR game leveraging replication technology: Integrated Azure cloud services for efficient multiplayer hosting and synchronization.

## ★ Startup Experience, Salerno

March 2023

### Co-Developer, Portalium:

- Part of a pioneering team recreating heritage sites through VR & AR technology.
- Advanced to the semi-final stage at the European Institute of Innovation & Technology (EIT) competition.
- Secured first place in the TEKNOFEST in tourism category, a testament to the innovative and impactful nature of our solution.

## Education

### Bachelor of Science in Software Engineering, Fırat University

September 2020 — June 2023

Successfully completed a comprehensive program emphasizing software architecture, coding practices, and software project management, cultivating proficiency in creating robust and innovative software solutions.
